

Make Sure Your New Home Gets The STAR Treatment.

Green Built Homes
of FloridaSM

Save money. Save energy. Save resources.

The ENERGY STAR[®] treatment, that is. ENERGY STAR qualified new homes are a better value in both the short and long term so you can live smart, live green and live well every day.

Take a look at the key benefits of an ENERGY STAR home:

Living Smart: Saves Dollars, Makes Sense

- ENERGY STAR homes are at least 15 percent more efficient than homes built to code, saving you money today.
- ENERGY STAR homes can have higher resale values and sell faster, potentially creating additional value tomorrow as energy rates increase over time.

Living Green: Nice to Mother Nature

- ENERGY STAR homes use less energy. Less energy used by your home means less energy produced for your home. And that means using fewer natural resources.
- Florida Green Building Coalition certified green homes save energy, water and more! For more information visit: www.floridagreenbuilding.org/db/

Living Well: Comfortable and Healthy

- ENERGY STAR homes have energy-efficient windows, tight ducting and air barriers and higher insulation quality requirements which:
 - Keep out heat and cold; maintaining even temperatures from room to room.
 - Reduce heat loss in winter and heat gain in summer
 - Prevent conditioned air leaks and improves airflow within your home.
 - Can help improve indoor air quality.

The performance of ENERGY STAR homes are guaranteed by state certified third party testing.

To find a builder who can provide your new home with the STAR treatment, go to www.nefba.com/greenbuilthomes.php and look for the list of Green Built Homes of Florida builders.

For more information on the ENERGY STAR for new homes program, visit the ENERGY STAR website at www.energystar.gov or www.jea.com.

JEA is a not-for-profit community-owned utility.
